it is a great comfort this sign of solidarity from your group. Italy is strongly hit by Covid-19 but we will resist, resist and resist and Italian people is responsibly answering to the need of social distance.

This crisis is going to change many things all over the world and the solidarity and the help for the weakest population must be the main principle to follow and really respect in the future.

We hope that this horrible pandemia will end and we can meet again

I sent your mail to the participants to the beautiful experience in Berlin and all the interested institutions of the Seminar we held last 2018.

Thanks and be strong

The human being will be stronger than any other threads or enemy if we stay in peace and and we are united
